

## ***TRAILS @ HIWAN***

### ***Pre-notification: Preventative Bark Beetle Spraying in Common Area***

I will be spraying the pine trees in your Common area Monday, June 30<sup>th</sup> -Thursday, July 3<sup>rd</sup>. The product being used is Tengard, active ingredient is permethrin. Please stay out of treated areas until the trees are dry, ( 1 hour after ). The schedule below provides you the streets that I will be working on each day and the common area trees being treated. I will be spraying the individual properties at the same time as the common area trees. If you would like to have your trees sprayed while I am in the area, please contact me beforehand to confirm. Please provide your name, address, phone #, and how many trees you would like sprayed. See the **Prepare for Spraying checklist** to help make sure you have things ready for spraying trees on your property or if your house is next to trees being treated in your common area. Please contact me if you have any questions or concerns.

I will provide an update at the end of each day with completion/progress status or to any schedule changes do to the weather.
